

FIBERGLASS-FREE GRILL SHEETS
NSF® CERTIFIED

NON-STICK RELEASE SHEET FOR SAFE AND EASY CLEANING FOR ALL CLAMSHELL-TYPE GRILLS

Fiberglass-Free Grill Sheets are enhancing the clamshell grill and toaster cooking experience with an innovative design and superior performance. The non-stick surface not only ensures that food cooks evenly and thoroughly, but also prevents sticking and messy buildups without any fiberglass transfer for a healthy grilling experience.

Reusability, cleanability, uniform release, and customizable sizes make them a versatile and cost-effective solution for any clamshell grill equipment. No more burnt food and difficult cleaning – TCI’s Fiberglass-Free Grill Sheets are here to provide a cleaner, safer and more efficient way to grill and toast food!

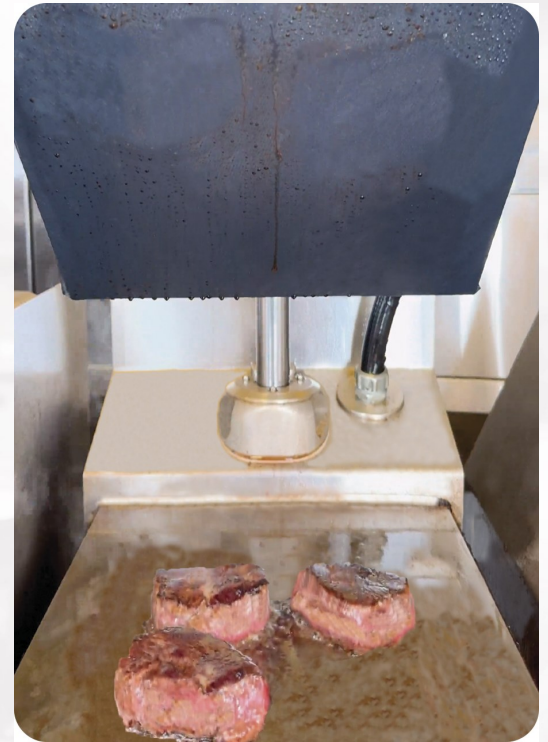

Fiberglass-Free food-grade material ensuring the safest and cleanest sheet for contact with food products.

NSF® Certified, providing peace of mind regarding product quality and consumer health.

Non-Stick surface helps to maintain the integrity and appearance of the food being cooked. It prevents tearing or breaking of delicate items and ensures even browning and cooking.

Consistent and Uniform Release, ensuring that products are easily removed from the Fiberglass-Free Grill sheet without any damage or residue.

High Temperatures up to 600°F (316°C) without warping or deteriorating, without losing their non-stick properties or degrading.
