

FluoroSign™ Logo Solutions

100% PTFE SIGNS ENGINEERED FOR THE MOST EXTREME ENVIRONMENTS

FluoroSign™ displays are an inexpensive way of ensuring permanent and visible name attachment to your PTFE products.

Available in many different sizes, shapes, and colors, FluoroSign™ displays can be purchased as individual signs for heat-sealing in your shop and in the field. Signs can also be included with orders for fabricated expansion joints, cut-to-size belts, or full-width product from TCI.

In order to heat-seal a FluoroSign™ to a PTFE material, it is recommended that a PFA or FEP heat-sealing adhesive film be used. Signs can be ordered with the adhesive film tacked to the back as an option. All-PTFE signs can also be attached to materials using conventional methods like sewing.

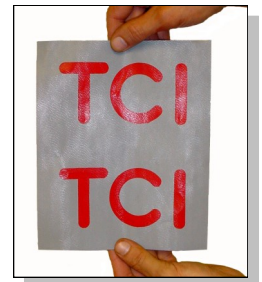

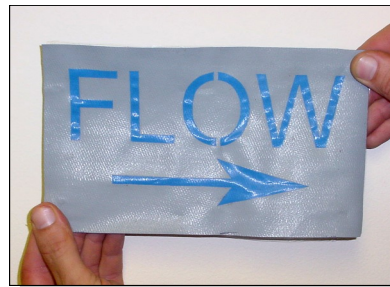

FLUOROSIGN™ CAN INCLUDE:

- Company name
- Web site address
- E-mail address
- Phone, fax, address
- Logos/Symbols
- Instructions, warning signs, dates, etc.

FLUOROSIGN™ BENEFITS:

- Will not degrade, even in the most severe industrial environments
- Will not wipe off like paints and other marking materials put on PTFE surfaces
- Are flexible and contain no rigid or sharp edges that can abrade other materials
- Can include symbols to aid in the use of products
- Can be clean-room and FDA compliant

FluoroSign™ Logo Solutions

100% PTFE SIGNS ENGINEERED FOR THE MOST EXTREME ENVIRONMENTS

FluoroSign™ displays can be customized to meet your exact needs.

- The minimum order quantity: **100**.
- Many fonts are available.
- Orders can be stored on TCI's shelf for attachment to expansion joints, cut-to-size belts, and full-width product.
- No tooling charge is required upon first agreed-upon design. If a change must be made requiring new tooling, the charge will be \$50 per new agreed upon design.
- Many customized logos and character variations can be included.
- Other sizes are readily available.

***Prices range from \$5 to \$25 each, depending on the size, complexity and number of colors.**

FLUOROSIGN™ BASIC DESIGN GUIDELINES:

To determine the layout of your sign:
Character Height = Character Width

Minimum Character Size = 1"

Maximum width of sign = 18"

Maximum height of sign = 18"

Minimum border width = 3/4"

For example, the TCI sign displays a 10 digit phone number. The ten digit phone number has 14 character spaces, including parentheses, dashes, and spaces. Using the minimum character width of 1", the total width required to display the phone number is 14" (14 spaces x 1").

When the 3/4" wide border is added to each side of the 14" wide phone number, the minimum total width required for a sign is 15.5".
