TCI Successfully Recertified to ISO 9001:2015

LONDONDERRY, NH October 22, 2026 — Textiles Coated International (TCI), a global leader in high-performance fluoropolymer films, laminates, and composite materials, has successfully completed its ISO 9001:2015 recertification, reaffirming the company's commitment to consistent quality, continuous improvement, and customer satisfaction.

The company's management system was assessed for conformity with the requirements of ISO 9001:2015, the internationally recognized standard for quality management systems. TCI has maintained ISO 9001 certification since its initial certification on October 22, 2014.

The certification covers the design, manufacture, and sales of fluoropolymer, silicone, and liquid crystal polymer products serving a broad range of industries, including but not limited to Energy, Chemical Processing, Food Processing, Aerospace, and Medical markets.

"Successfully completing our ISO 9001:2015 recertification confirms that TCI's quality management system continues to meet internationally recognized standards. More importantly, it reflects our ongoing commitment to consistent processes, continuous improvement, and delivering reliable, high-quality products that meet our customers' requirements," said John Coolidge, Quality Manager of TCI.

The successful recertification reflects TCI's continued focus on maintaining robust quality processes across its operations while supporting the increasingly demanding requirements of the industries and applications it serves. From advanced fluoropolymer films and laminates to engineered composite solutions, TCI applies a structured quality management approach throughout the product lifecycle.
