

Therma-Pure™ INSULATION MATERIAL

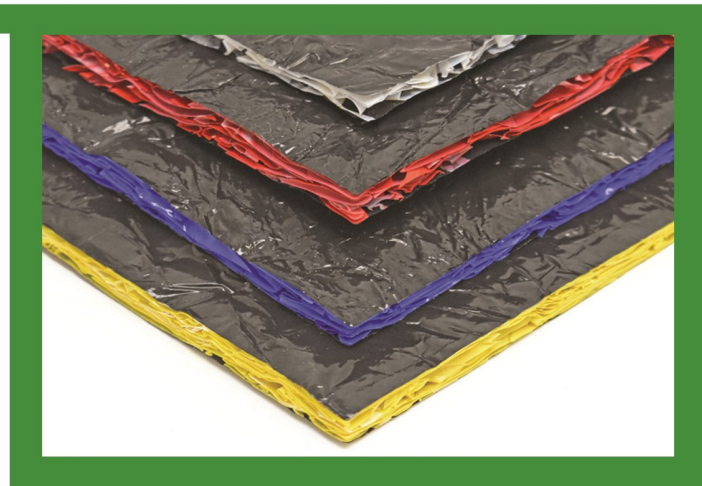

THE ULTIMATE GREEN INSULATION MATERIAL

Therma-Pure™ Insulation Material is engineered to be a lifetime insulation solution for ultra-clean environments. Therma-Pure™ is the ultimate green material: it is made entirely of recycled high-temperature plastic, it has an unlimited service and shelf-life, and it helps to prevent the wasteful loss of energy. This flexible material can be used in both indoor and outdoor applications. It is an ideal insulation solution for high purity applications such as clean-rooms.

Therma-Pure™ Advantages Include:

- Extreme operating temperature range -400°F (-240°C) to 600°F (316°C)
- Made entirely of recycled plastic
- Unaffected by chemicals (pH range 0-14) and UV
- Fire-Resistant and Non-Combustible
- Minimizes Corrosion Under Insulation (CUI)
- Non-fibrous material - handling will not contaminate the work environment
- Moisture, mold, and bacteria-resistant
- Suitable for wash-down environments
- Highly flexible and easily cut by hand or machine

Ideal Applications:

- Clean-Room/ Sanitary
- Food Processing
- Semiconductor
- Pharmaceutical
- Bio-Pharma
- Aerospace
- Electrical
- Oil and Gas
